Regular Replacement  
= **Cleaner Water**

LZS8WSLP

### **Serve up Filtered Drinking Water**

Replacing your drinking water filter as recommended gives you the added assurance of serving cleaner, safer water. Our filters are equipped with quick-disconnect, so a simple quarter-turn installation makes filter replacements easy. An automatic inlet shut-off valve closes when the filter is removed to minimize spills.

# Engineered for Performance

Our filters are designed to work with Elkay® water delivery products, including our award-winning ezH2O® bottle filling station. Products with a visual filter monitor indicate when it's time to replace the filter.

- Tested and certified to NSF/ANSI 42, 53 and 401 to reduce harmful contaminants such as lead, cysts, Class I particulate, sediment; also shown to reduce microplastics and chlorine taste and odor<sup>1</sup>
- Radial flow-thru design and ATS-treated activated carbon effectively treat incoming water
- Spun polypropylene prefilter mesh prevents large, coarse sediment and particles from entering and clogging filter media, extending the life of the filter
- Self-contained replaceable cartridges, limiting exposure to contaminated media

<sup>1</sup> All Elkay filter products are tested and certified to the standards above. Certifier varies; check individual product pages for information.

Filter life varies based on filter capacity and usage.

## How Elkay Filters Work

### Water Enters

Radial flow-thru design means efficient treatment of incoming water.

### Carbon Block Reduces Contaminants

ATS-treated activated carbon reduces lead, cysts, fine sediment, microplastics and chlorine taste and odor.

51300C

### Enjoy Filtered Water

Helps reduce contaminants for cleaner, filtered drinking water.
