WaterSentry® High-capacity Replacement Filter

LZS8WSLP

Save Time, Money and Resources With Twice the Filter Life

The Elkay WaterSentry® 51600C high-capacity replacement filter is designed for use in enhanced ezH2O® bottle filling stations. Its higher capacity means fewer filter replacements and maintenance costs while delivering cleaner, safer water.

LZS8WSLP

Cleaner Water Without the Hassle

Largest Capacity Lead Filter

For use in high-trafficked areas where ezH2O enhanced bottle filling stations are frequently used; replace every 6,000 gallons or one year after installation.

Reduces Lead and Other Contaminants

Only one filter is needed to reduce lead, cysts, Class I particulate, microplastics and chlorine taste and odor. Tested and certified to NSF/ANSI 42, 53 and 401 standards. Made with activated carbon to improve taste and odor.

Save Money, Save Time

Larger capacity filter means fewer filter changes and purchases and lower maintenance costs. 51600C offers double the filter life, for less than double the cost.

Quick, Easy Replacement

This small but mighty filter design is easy to replace in enhanced ezH2O bottle filling stations. Equipped with quick disconnect and ¼-turn installation, as well as an automatic inlet shut-off valve that closes when the filter is removed. Plus, enhanced ezH2O bottle filling stations automatically reset the status light when filter is changed.
