

Lead Lowdown:

Exploring the Dangers of Lead

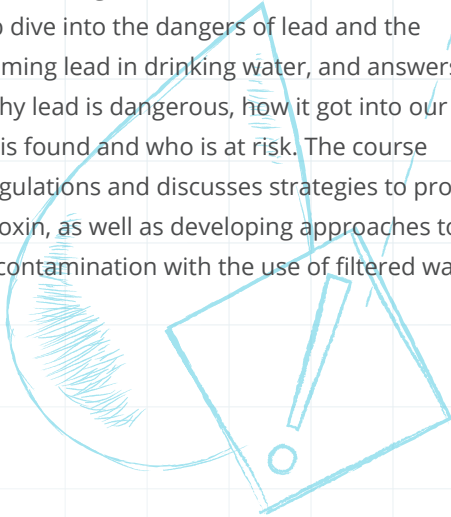

Program #: ELK9084

Credits: 1 AIA LU/HSW, 1 ASPE CEU/PDH*, .1 NKBA LU

HSW: Yes

Description:

The prevalence of lead in drinking water isn't an isolated issue. This course takes a deep dive into the dangers of lead and the harmful effects of consuming lead in drinking water, and answers basic questions about why lead is dangerous, how it got into our drinking water, where it is found and who is at risk. The course further reviews water regulations and discusses strategies to protect against this ubiquitous toxin, as well as developing approaches to proactively reduce lead contamination with the use of filtered water delivery units.

**This course is approved for PDH credit but is subject to compliance with each states rules and guidelines.*

Learning Objectives:

1. Definition of lead.
2. A look at lead:
 - How it is used?
 - What makes it dangerous?
 - Who is at risk?
 - Lead in schools.
3. Learn how lead gets into water and about lead laws.
4. Explore options on what we can do:
 - Water testing.
 - Filtration systems.
