

Filtration Reimagined

In a world of rising water concerns, Elkay leads the clean water revolution. Elkay Pro Filtration™ bottle filling stations deliver superior, smarter water while making filter maintenance remarkably simple for busy airport operations teams.

Designed specifically for high-traffic terminals, these stations feature advanced filtration that removes more contaminants than standard units—delivering cleaner, safer water for travelers from around the world, 24/7/365. With top-access ergonomic filter changes and long-lasting filters, airports can ensure exceptional water quality with minimal maintenance disruption to round-the-clock operations.

SKU: LZS8WSBPRO

Engineered for Protection

Discover state-of-the-art filtration technology designed for the non-stop demands of modern airports, with unmatched capacity and advanced contaminant defense that keeps passengers hydrated.

Filter SKUs: FLP4, FL6, FL10 and FSR5

- ✓ Ultra-capacity lead filters last up to 10,000 gallons (standard with base models)
- ✓ High-capacity 6,000-gallon lead filter for medium to high-traffic areas
- ✓ NSF/ANSI 42, 53 and 401 certified to reduce total PFAS*, lead, microplastics, asbestos and more
- ✓ Optional stage 1 sediment filter for optimal performance in high-sediment areas
- ✓ Optional UV technology

**This system has been certified by IAPMO R&T and tested according to NSF/ANSI 42, 53 and 401 for the reduction of these substances*

Wellness & Sustainability Take Flight

Airports today balance environmental goals with passenger amenities. Just 15 stations prevent 1.89 million bottles from landfills, eliminating 89,200 pounds of waste annually. This transforms your sustainability initiatives into visible action while meeting travelers' expectations for quality filtered water throughout their journey.

Schedule an assessment today.
