

Program #: ELK9101

Credits: 1 AIA LU/HSW, 1 ASPE CEU/PDH*, .1 IDCEC/ASID LU, .1 NKBA LU

HSW: Yes

Description:

Due to the COVID-19 pandemic, the prevention of germs and their spread has become increasingly important and remains a top priority. Public spaces have adopted new measures to address such concerns, implementing solutions designed to help combat the spread of germs.

This presentation will discuss how germs spread; how opinions have changed pertaining to shared surfaces; how public spaces are evolving because of the COVID-19 pandemic; and how hands-free products are key to providing hygienic solutions.
