

Let Performance Be Your Guide

Protect your restroom against harsh conditions with Zurn's high performing technology that delivers a longer lifespan and cost savings to building owners and maintenance teams.

EZ Gear Technology – No Solenoid

- Gear based actuation eliminates the need for solenoids.
- Consistent performance throughout the lifespan of the valve.
- Industry-leading reliability from AquaVantage® and GO BLUE® internals.

GO BLUE Diaphragms, Gaskets and Seals

- Unique thermoplastic elastomer (TPE) construction **lasts 8-10 times longer** than comparable black rubber material.
- Superior resistance to chemicals such as chloramine, chlorine and other harsh chemicals.
- Reduces run-ons/leaks and inconsistent flush volumes that necessitate costly double flushing.

Heavy-Duty Ceramic Disc Cartridge

- Withstands elevated temperatures for effective thermal disinfection.
- Provides up to **1,000,000 cycles** while providing superior leak prevention.
- Ceramic disc operation eliminates compression seals and streamlines water path.

Hydro-X Sustainable Power

- Energy harvesting technology extends battery life for 10 years or more of uninterrupted power.
- High efficiency design optimizes performance at flow volumes down to 0.35 gpm and up to 1.5 gpm and above.
- Simplified installation saves time and upfront costs over hardwiring.

Upgrade to Zurn — deliver reliability, precision, and efficiency for the life of your restroom.

Water closet and urinal flush valve repair parts and complete kits are available to extend your restroom's performance. Our components are also compatible with most competitor models.

- Clog-Resistant Diaphragm
- Diaphragm Disc
- No Leak Handle O-Ring
- Handle Seal
- Handle Washer
- Tailpiece O-Ring
- Stop Valve Seal
- Stop Valve O-Ring
- Vacuum Breaker
- Spud Gasket
- Spud Washer
